

Managed Care Pharmacy

PGY1 Residency 2015

Learn. Grow. **Impact.**

Southern Scripts

Southern Scripts is a Prescription Benefit Manager (PBM). The primary focus of Southern Scripts is geared towards self funded employer groups; however, Southern Scripts is involved in many other areas of the PBM world. Based in Natchitoches, Louisiana, Southern Scripts has natural Southern roots and hospitality that is unparalleled by industry competitors. Owned and managed by pharmacists, Southern Scripts combines this Southern mentality with a patient-centered focus to create a PBM experience that does things the correct way.

Why complete a residency with Southern Scripts?

Southern Scripts has a residency program that is a unique, amazing experience. The resident will be exposed to all areas of the company, including: sales, clinical management, rebate contracting, pharmacy data analysis, operations, policy development and various other areas.

The unique PBM environment of Southern Scripts will allow for a resident to gain complete understanding of the operations of a PBM. Our collaboration with The University of Louisiana-Monroe is a relationship that allows the resident to be involved with lectures, projects and research opportunities within the university.

The amount of experience you will receive will undoubtedly prepare you for a successful career in managed care.

Resident Responsibilities

This is a structured, post graduate education program centered around ASHP modeled residency learning outcomes. Special focus is placed on clinical management programs, while also providing opportunities for unique training in all areas of Southern Scripts.
